

ZELANDINI BORROMEU GUTERRES

Computer Science & Economics Graduate Candidate

Auckland, New Zealand | +64 27 231 2079 | zelandiniduarte@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year University of Auckland Computer Science and Economics conjoint student with practical experience building Python web applications, browser automations and data workflows. Teaching Assistant and Resident Advisor trusted to explain technical concepts, support diverse communities and deliver reliable work. Seeking graduate software engineering, data or technology roles where strong problem-solving and communication create measurable value.

TECHNICAL SKILLS

Languages: Python, Java, C#, JavaScript, HTML/CSS, SQL, R

Frameworks & Data: Flask, FastAPI, SQLAlchemy, Jinja2, pandas, REST APIs, pytest

Databases & Tools: PostgreSQL, SQLite, Git/GitHub, Selenium WebDriver, Docker, VS Code, PyCharm, Render, Unicorn

EDUCATION

Bachelor of Commerce (Economics) / Bachelor of Science (Computer Science)

2022 - Nov 2026 (expected)

University of Auckland | Auckland, New Zealand

GPA: 7.0/9.0 | Selected study: Algorithms & Data Structures, Software Architecture, Machine Learning, Cybersecurity, Object-Oriented Software Development

Academic recognition: A+ achievement certificates in COMPSCI 101, COMPSCI 130, COMPSCI 230 and COMPSCI 331; A+ in MATHS 108; Introduction to SQL certificate.

SELECTED PROJECTS

ParcelMatch - RA Parcel Scanner | Python, Flask, JavaScript, Gemini API, Firestore, RapidFuzz, Google Cloud Run

- Designed and deployed a mobile-first Flask web application using Gemini OCR, Firestore, RapidFuzz and Google Cloud Run to extract parcel-label information, match it against resident records, flag uncertain results for human review and provide authenticated RAs with verified student IDs through a desktop batch dashboard.

RA Resident Tracker Automation | Python, Selenium, Excel Web, Git

- Built a browser automation workflow that retrieves StarRez resident details and updates an Excel-based RCI tracker, handling dynamic web elements, spreadsheet navigation, status formatting and repetitive data-entry tasks.

Splyt | Flask, SQLAlchemy, SQLite, Jinja2, JavaScript

- Built and deployed a full-stack expense-sharing application with group expenses, currency selection and settlement logic that calculates simplified repayments between friends.

EXPERIENCE

Teaching Assistant & Marker - Computer Science | University of Auckland | Auckland

Feb 2025 - Present

- Marked 100+ Python assignments across COMPSCI 101 and COMPSCI 130, evaluating correctness, code quality and adherence to specifications.
- Debug student code and provide clear, actionable feedback that strengthens programming fundamentals and problem-solving practices.
- Support teaching across introductory and intermediate Computer Science courses, including COMPSCI 230.

Resident Advisor | University of Auckland Accommodation | Auckland

Feb 2025 - Present

- Build inclusive residential communities by planning events, supporting student wellbeing and connecting residents with appropriate university services.
- Coordinate with accommodation staff and fellow advisors to deliver events and operational responsibilities across communities serving 600+ residents.
- Created Python and browser-automation tools to reduce repetitive resident lookup, parcel processing and tracker-update work.
- Led village teams in inter-residential basketball, volleyball and futsal tournaments.

AI Trainer - Python Projects | DataAnnotation | Remote

Nov 2025 - Jan 2026

- Evaluated and refined AI-generated Python solutions for logical correctness, code quality and instruction adherence.
- Used Docker-based environments to test outputs and rank model responses based on technical accuracy.

Intern - ASEAN Affairs | Ministry of Foreign Affairs and Cooperation, Timor-Leste | Dili

Nov 2025 - Jan 2026

- Supported Timor-Leste's post-accession ASEAN work through research, workshops, meeting coordination and stakeholder communication.
- Prepared reports, briefing notes and meeting minutes for senior officials, tracking deliverables across the ASEAN Economic Community pillar.
- Coordinated with national and international stakeholders to support alignment on regional economic policy priorities.

ADDITIONAL LEADERSHIP & INTERESTS

DJ (2024 - Present): Perform at university, Computer Science Society and private events, specialising in Hip-Hop, R&B, Afrobeats and Brazilian Funk.

Interests: Basketball, guitar, music production, volleyball, football, travel and live music.
